Municipal Level Infrastructure

40 Km water pipe in Kandahar

2500 m³ water tank
Jalalabad: 2 water reservoirs (each 2500m³)

Drainage, open sewer

Landscape around Jalalabad, limited rainfall
Community Level Infrastructure

Water Tank and Water pump Mazar
Herat
Concluding Remarks

Water Supply for Rapid Expanding Cities huge challenge

Ground water (main source) is increasing polluted due to lack of sewerage systems

Opportunities for Japanese Support in partnership with UN-Habitat
- Decentralized water supply systems
- Municipal Water Supply systems (finding water, storage and distribution)
- Water treatment
